Finally, thank you for submitting copies of your Quality Assurance Project Plan (QAPP) and Best Management Practices (BMP) Plan (revised August 2017) with your NOI. As a condition of this authorization, the permittee must update the BMP Plan to include: operations and maintenance of the treatment system, diagram indicating how flow is controlled, carbon filter replacement schedule and any triggering events for maintenance. As a reminder, changes to limits and monitoring, DMR submittal frequencies and forms, annual reporting requirements, as well as BMP contents have been made under the reissued APDES General Permit AKG332000. The Department recommends permittees carefully review the Permit and Factsheet, then update their BMP Plan, QAPP, and submittal schedules as necessary to reflect these changes.

If you have any comments or questions regarding this authorization, please feel free to contact Jamie Grant at (907) 269-4720, or Jamie.Grant@alaska.gov.

Sincerely,

Gerry R. Brown, PE - Manager
